## EXPERIENCE

- **Meta**

Senior Product Designer, Ads

Feb 2024 – July 2026

  - Led end-to-end strategy for Messaging Ad Product Growth; clarified the multi-destination messaging journey and turned ambiguity into a clear solution, unlocking \$98K/day and \$40M in annual revenue potential.
  - Shipped 15+ features that shaped strategy across the advertiser platform; drove strategic partnerships across 10+ teams (researchers, engineers, product managers, legal, designers) to align on goals.
  - Transitioned to CTX Multi-destination mid-H2; rapidly ramped on the space and led design for two high-impact experiments that exceeded iCTX targets (+\$99.46K/day vs +\$51K/day goal).
  - Facilitated strategic roadmapping sessions that shaped 18+ PO projects for 2026 roadmap across account linking and automation guidance initiatives, collaborating with XFN leadership to align on multi-half priorities. We launched 12 of those projects with revenue wins.
  - Used Figma Make and Claude Code to quickly build and test MVPs, while keeping a clear roadmap for future improvements.
- **Gusto**

Senior Product Designer, Growth

May 2021 – Feb 2024

  - Co-led design for Gusto's first end-of-year promotional campaign, driving a +22% YoY increase in account joins.
  - Redesigned the plan selection experience, increasing upgrade click rate by +8.7% and reducing downgrade click rate by 3%.
  - Championed a company-wide feature adoption initiative with Engineering and Product, shipping iterative experiments that improved adoption by +8.43%.
  - Led product strategy and end-to-end design of an à-la-carte pricing experiment, letting users purchase features as add-ons; drove a +10.6% increase in CVR.
- **Expedia Group (Hotwire)**

Product Designer, Engagement

Sep 2018 – May 2021

  - Led the end-to-end product strategy and design for Hotwire's highest-converting email campaign (Car Rental and Hotel), achieving +15.6% CTR, +8.0% click-to-open rate, and +4.3% conversion lift.
  - Improved mobile search conversion by redesigning the date picker and reducing unnecessary error messages, cutting user friction at critical touchpoints.
  - Rebuilt loading animations across search, billing, and confirmation pages to educate users on Hot Rates; improved CVR +0.8%, GPPQ +0.2%, and Hot Rates share +0.5%.
